OBJECTIVE

Aspiring to leverage my skills and experience as a Full Stack Developer in a dynamic and innovative organization. Eager to contribute to impactful projects while continuously expanding my technical expertise in both front-end and back-end development. Dedicated to delivering high-quality solutions, collaborating effectively and driving success through my passion for web development.

EXPERIENCE

• Tiggzy IT

Full Stack Developer <MERN/>

Oct 2023 – Present

Designed and developed dynamic, responsive user interfaces, built RESTful APIs, and managed data with MongoDB, Mongoose, and MySQL. I deployed and optimized applications on CPanel and Digital-Ocean, resolved stack-wide issues, and collaborated with teams to deliver project-aligned solutions using Git and GitHub for version control.

• Freelancing

Junior Front-End Developer

Feb 2023 – Sep 2023

I built responsive user interfaces, collaborated with clients to deliver tailored solutions, and integrated designs with back-end systems. I translated wireframes from tools like Figma and Adobe XD into interactive web pages and resolved front-end issues to enhance functionality and user experience.
